Experience

Jul 2024– Dec 2024 Remote, USA
Senior Software Engineer
Surface Labs

Worked with Surface labs(YC 23) to build an AI enabled workflow on top of their form builder. The workflow gets triggered upon successful/unsuccessful form submissions. The workflow gathered all the necessary details about the client filling the form and sends them a personalised email. This workflow was deployed and it helped them increase the conversion rate upto 37%.

Jan 2024 – June 2024 Remote, Singapore
Full Stack Founding Engineer
FusionAds.ai

- CICD pipelines and infrastructure management, autoscaling in GCP.
- Implemented LLM api calls using Langchain and python.
- Developed a workflow builder which allowed developers to create custom apps on our platform which they can integrate with anything in our app ecosystem.
- Built scalable services in GCP like: Auth, Notification, Email, Storage.
- Skills used: Nodejs, TypeScript, MongoDB, GCP, Langchain, Python, Postgres

Jan 2022 – Dec 2023 Remote, Singapore
Full Stack Engineer
Evolv.world

- Developed Web3 enabled in-house social user management service.
- Built backend for a proof of appearance nft distribution in a Dortmund football match
- Designed and implemented an unique solution to scale NFT owning experience called lazy minting that would consistently mint in the background.
- Developed entire backend platform from scratch that worked like shopify for NFTs
- Skills: Nodejs, Typescript, AWS ECS, MongoDB, Redis, AWS Lambda, AWS SQS, Github Actions

Jan 2020 – Dec 2021 Remote, Delhi
Software Engineer(backend)
Innovaccer

- Developed and maintain 2 SAAS (care management) solutions being used by 10+ clients currently making millions of dollars in ARR.
- Skills: Django, Python, Docker, Git, MongoDB, ElasticSearch
